DANCAN MORANG'A OCHWANG'I

Junior Software Developer

Nairobi, Kenya | +254 743 062 859 | dancanmoranga2@gmail.com
Portfolio: https://dantehub209.github.io | GitHub: https://github.com/Dantehub209

PROFESSIONAL SUMMARY

Junior Software Developer with a Diploma in Computer Science, working in IT Services at Boxleo Courier & Fulfilment Services. Built TransportIQ, a full-stack logistics management platform using React, TypeScript, Python (FastAPI) and PostgreSQL (Supabase), covering fleet management, shipment tracking, multi-level finance approvals and performance reporting. Skilled in REST API development, relational database design, role-based access control, Git and CI/CD with GitHub Actions. Seeking a Junior Software Developer role to grow as an engineer on a collaborative team.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, Dart, SQL, HTML, CSS
- **Frameworks & Libraries:** React, FastAPI, Flutter, Tailwind CSS, Vite, Recharts, Pydantic
- **Databases & Backend:** PostgreSQL, Supabase, REST APIs, JWT Authentication, Role-Based Access Control, Row-Level Security, Stored Procedures, Google Apps Script
- **Tools & DevOps:** Git, GitHub, GitHub Actions (CI/CD), Vercel, Netlify, GitHub Pages, VS Code
- **IT Support:** Computer and printer repair, hardware and software troubleshooting, networking (LAN, Wi-Fi, routers, switches), software installation, user account management, help desk and end-user support

PROFESSIONAL EXPERIENCE

IT Officer | Boxleo Courier & Fulfilment Services, Nairobi, Kenya | August 2026 – Present

- Provide end-to-end IT support to staff across the business, from first-line help desk requests to resolving technical issues.
- Diagnose and repair computers, laptops, printers and other hardware, and install, configure and update software.
- Set up, maintain and troubleshoot the company network, including LAN/Wi-Fi, routers, switches and internet connectivity.
- Manage user accounts, email and access permissions, and support staff with day-to-day system use.
- Designed and developed TransportIQ (live: transportiq-rho.vercel.app), an internal logistics management platform, using React, TypeScript, Python (FastAPI) and PostgreSQL (Supabase).
- Built 14 REST API modules covering vehicles, drivers, riders, merchants, operations, documents, finance, routing, reporting and notifications.
- Implemented a multi-level finance approval workflow for trip and field expenses with named approvers and an M-PESA payment audit trail.
- Added in-app and email (SMTP) notifications so approvers are alerted when a request needs their action.
- Wrote versioned SQL database migrations and set up GitHub Actions CI to lint, type-check and build the application on every change.

PROJECTS

Okebori POS — Parcel Point-of-Sale App | Dart, Flutter | github.com/Dantehub209/Okebori_pos

- Built a mobile point-of-sale application for parcel counters to record parcel bookings and payments.

SACCO Management System | React, Vite, Supabase, PostgreSQL, Netlify | Live: greathousingco-operativesocietyldt.netlify.app | github.com/Dantehub209/sacco-clean

- Built a web-based SACCO management system with 18 modules, including members, savings, individual and group loans, member statements, fines, welfare, meetings, bank deposits, money market fund and expenses.

- Designed a PostgreSQL database of 17 tables, 12 reporting views and 19 stored functions for deposits, loan disbursement and repayment.
- Secured data with 41 row-level security policies and kept an audit log of every financial action.
- Added Excel and PDF export for reports and member statements; deployed the app on Netlify.

mloop — Chama Management System | JavaScript | github.com/Dantehub209/mloop

- Built a web system for savings groups (chamas) to track members, contributions and payouts.

Car Rental System | Java | github.com/Dantehub209/CarRentalSystem.java

- Created an object-oriented Java application to manage rental vehicles, customers and bookings.

EDUCATION

Diploma in Computer Science (Level 6) | Thika Technical Training Institute, Thika | 2023 – 2026

- Relevant coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Systems, System Design, Networks and Distributed Systems, Web Development and Design, Machine Learning and AI
